

Cant remove Google Maps entry added by someone else

[Report abuse](#)

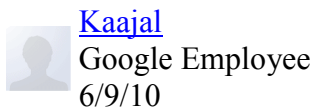

Duplicate listing issue; someone has added a Google Maps entry with my business as part of the title.

<http://maps.google.ie/maps/place?hl=en&newwindow=1&um=1&ie=UTF-8&q=web+design+wexford&fb=1&gl=ie&hq=web+design&hnear=Wexford,+Co.+Wexford&cid=17805991323493568836>

I have tried to claim and remove this record but it still remains. It appears next to my verified listing and looks very dubious to potential customers, anyone know how I can remove this? there is no claim your business link showing to me. Better still can some one from Google remove it. Its total spam, I hate to see some competing business getting away with this stuff.

You should verify the listing that needs to be deleted. Please follow the steps below to claim, verify, and delete the listing:

- 1) Click on the **Business owner?** link that you see on the top right side of this [1] listing.
- 2) Choose the radio button next to **Edit my business information**. You will be taken to your dashboard where you will see this listing.
- 3) After you click on **Submit**, you will be taken to the verification page. Choose how you want to verify (SMS, postcard, phone) depending on the options displayed to you and click on **Finish**
- 4) After you PIN verify the listing, you can delete it from Google Maps.
